The use of face coverings (masks) as part of the health and safety protocols has been a much discussed topic. Read each of the following statements and select the statement that most closely reflects your position on the use of masks in school when school reopens in September:

256 responses

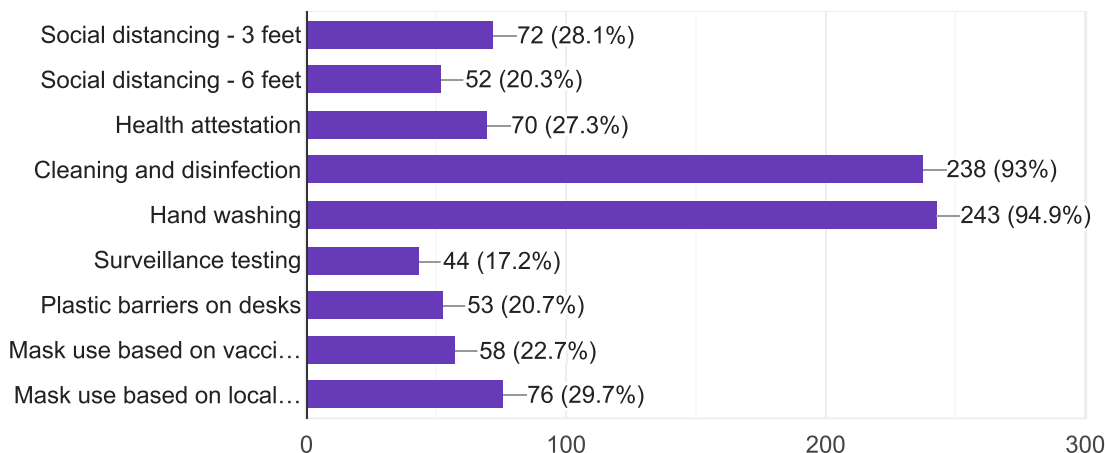

- Masks are a critical element to preventing the spread of COVID-19
- Masks should be used situationally as part of a "layered" approach
- Vaccination status should be the determining factor for mask requirements
- Masks should be optional for students and staff while inside school buildings
- Masks should not be used by staff nor students as part of the health and safety protocols

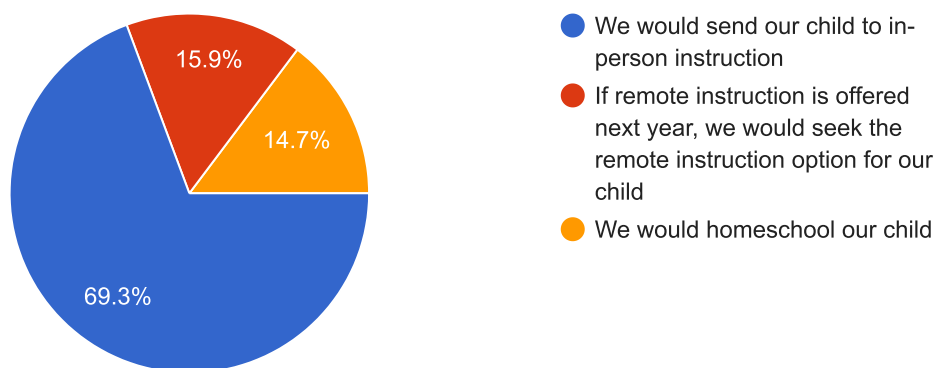

The Centers for Disease Control has outlined a layered protection strategy in its guidance. Which of the following layered protection strategies do you support as elements of a local health and safety plan for returning to school in September? (Check all that apply)

256 responses

If masks are required in guidance provided by local or NYS health departments for both staff and students, how would this impact your decision regarding returning your child to in-person instruction when school reopens in September?
